NATIONAL

Project History Summary as of June 30, 2019

NATIONALLY, RMEF AND ITS PARTNERS HAVE COMPLETED 12,135 CONSERVATION AND HUNTING HERITAGE OUTREACH PROJECTS WITH A COMBINED VALUE OF MORE THAN $1.1 BILLION. THESE PROJECTS HAVE PROTECTED OR ENHANCED MORE THAN 7.5 MILLION ACRES OF HABITAT AND HAVE OPENED OR IMPROVED PUBLIC ACCESS TO MORE THAN 1.2 MILLION ACRES.

Oregon Elk, Habitat Get $355,000 in RMEF Grants

MISSOULA, Mont.—The Rocky Mountain Elk Foundation provided $355,128 in grants to fund nearly two dozen habitat enhancement and elk research projects in Oregon.

The projects benefit 10,317 acres of wildlife habitat across Coos, Crook, Curry, Douglas, Grant, Harney, Klamath, Lake, Lane, Lincoln, Linn, Marion, Morrow, Tillamook, Umatilla, Union, Wallowa and Yamhill Counties. One of the projects benefits much of eastern Oregon.

"There is a great need to gain a better understanding of the productivity of elk populations as well as movement, behavior, private versus public habitat usage and other issues that affect elk in Oregon. That, in part, is why we provided grant funding for five detailed research projects," said Blake Henning, RMEF chief conservation officer. "The funding also goes toward prescribed burning, forest thinning, meadow restoration, noxious weed treatment and other work that enhances habitat for elk and other wildlife."

RMEF has 27 chapters and more than 17,000 members in Oregon.

"Elk and elk country in Oregon have our volunteers to thank for generating this funding by hosting banquets, membership drives and other events. We so appreciate their time and talents as well as their dedication to our conservation mission," said Kyle Weaver, RMEF president and CEO.

Below are Oregon's 2019 projects, listed by county:

Coos County

- Plant native grasses and forbs within coastal forest openings across 93 acres of Bureau of Land Management (BLM) land to improve forage for wildlife (also benefits **Douglas** and **Curry Counties**).

Crook County

- Seed 455 acres of meadow, sagebrush and aspen habitat on the Ochoco National Forest. Crews will also burn slash piles created during 2018 thinning operations. The project area is utilized year-round by elk and also benefits mule deer, antelope, wild turkey, California and mountain quail, Hungarian partridge and other species.
- Enhance about 1,345 acres of wildlife habitat on the northern edge of the Ochoco National Forest. Treatments include meadow restoration, aspen enhancement and

- Treat 891 acres of elk summer range in the North Warner Mountains on the Fremont-Winema National Forest. This is the fourth year of a seven-year effort to restore aspen on a landscape-scale while also improving wildlife habitat and creating both natural firebreaks and local jobs.

Lane County

- Use mechanical mowing, chain saws and other means to improve 180 acres of meadow habitat on the Siuslaw National Forest. Annual maintenance prevents the incursion of invasive vegetation and benefits elk, black-tailed deer and other bird and animal life (also benefits **Lincoln** and **Douglas Counties**).
- Prescribed burn 100 acres to trigger the growth of native vegetation and improve overall forest health on the Willamette National Forest. The treatment is part of the multi-year Jim's Creek Restoration Project to return the area to its historic state of scattered Douglas fir, ponderosa pine and Oregon white oak stands with a dense bunchgrass understory.
- Apply a variety of treatments to benefit wildlife habitat across 161 acres in the McKenzie River Ranger District on the Willamette National Forest. Specific approaches include noxious weed treatment, prescribed burning, mulching, planting seed and wetland enhancement.

Linn County

- Apply a combination of forest thinning, prescribed fire, seeding and other treatments to restore meadow and wetland habitat at three sites in the Western Cascade Mountains on the Willamette National Forest (also benefits **Lane County**).
- Apply a combination of treatments to enhance and restore six mountain meadows over 157 acres where non-native species and encroaching conifers are affecting habitat in the Sweet Home Ranger District on the Willamette National Forest.

Marion County

- Restore and maintain a 38-acre large mountain meadow on BLM land northeast of Gates that is a migration corridor and provides summer forage.

Tillamook County

- Maintain and restore 135 acres of meadows in the Hebo Ranger District on the Siuslaw National Forest. Crews will institute a combination of noxious weed, forest thinning and planting treatments to expand existing meadows by removing competing vegetation (also benefits **Lincoln** and **Yamhill Counties**).

Umatilla County

- Provide funding for research to provide biologists a better understanding why elk are shifting their range from public to private lands in the Blue Mountains. Crews will capture and place GPS collars on 50 cow elk so biologists can monitor their migration and use of summer and winter range while also aiming to reduce private land damage and increase hunting opportunity (also benefits **Morrow County**).

PERMANENT LAND PROTECTION PROGRAM – NATIONAL PRIORITY

HURRICANE CREEK ▧ EAGLE CAP WILDERNESS

ACRES
- 470

PURCHASE PRICE
- $564,000

CONSERVATION PARTNERS
- USDA Forest Service
- Rocky Mountain Elk Foundation
- Oregon Department of Fish and Wildlife

SUPPORTERS
- Oregon Hunters Association
- Wallowa Land Trust

RESOURCE VALUES
- Elk, mule deer, white-tailed deer, bighorn sheep, mountain goats
- Endangered, Threatened, or Sensitive species, including the peregrine falcon, bald eagle, wolverine, and bull trout
- Townsend's big-eared bat and fringed myotis
- Chinook spawning habitat
- Old growth ponderosa pine and western larch

RECREATION & COMMUNITY BENEFITS
- Public access guaranteed for future generations
- Critical elk transition area
- Hunting, fishing, bird watching, and other public recreation
- Support the Oregon Wildlife Conservation Strategy in the Blue Mountains Eco-Region
- Contribute to USFWS recovery plans for bull trout and Chinook salmon

A unique opportunity exists in Oregon, just south of Enterprise and Joseph, to protect the largest private inholding within the Eagle Cap Wilderness. This 470-acre property includes major access points to the Wilderness that are in jeopardy of disappearing. In order to guarantee this public access for the future, the Rocky Mountain Elk Foundation is partnering with the Wallowa-Whitman National Forest to secure a conservation outcome.

The Eagle Cap Wilderness is Oregon's largest and most popular wilderness with several major trails traversing the property. Portions of the Hurricane Creek and Falls Creek Trails, some of the most heavily used trails for access into the Wilderness, are at risk of losing permanent public access. Currently, the Forest Service lacks access easements for these trails. If a conservation outcome cannot be achieved, the property may be developed for commercial recreation that could limit access; and, any public access could come at a price that would be determined by the developer. RMEF believes that free, unfettered access should continue to be available for hunting, fishing, and recreation in the Eagle Cap Wilderness. Forest Service ownership will ensure public access, increase management efficiency of the landscape, and secure a critical elk transition area.

Lying between elk summer range in the high country and winter range in the lowlands, the Hurricane Creek property serves as a critical elk transition area. Spring Chinook salmon also use the upper reaches of Hurricane Creek for spawning, and Little Granite Creek and Falls Creek, two major tributaries to Hurricane Creek, cross the subject property. Other Endangered, Threatened, or Sensitive species that use the area include bull trout, wolverine, peregrine falcon, bald eagle, western spotted frog, inland tailed frog, Townsend's big-eared bat, and fringed myotis. Mule deer, white-tailed deer, bighorn sheep, and mountain goats are all present within the Eagle Cap Wilderness and the surrounding area.

With your help, RMEF can protect the Hurricane Creek property and keep its importance to wildlife intact, and the public's enjoyment of the natural resources readily available in the Eagle Cap Wilderness.

FOR ADDITIONAL INFORMATION, CONTACT OUR LANDS & CONSERVATION DEPARTMENT AT 1-800-225-5355 EXT. 445 OR LANDS@RMEF.ORG.

HEADWATERS OF THE JOHN DAY RIVER

SUMMARY

LOCATION
Grant County, Oregon

PROJECT SIZE
13,082 acres

COMPLETED
December 30, 2013

RMEF
ELK COUNTRY *Legacy*

In the Headwaters of the John Day River, 13,082 key acres of private lands intermingled with the Malheur National Forest are now permanently protected through a successful collaborative effort with the D.R. Johnson Family and the United States Forest Service (USFS). National Fish and Wildlife Foundation's Acres for America program, local, state, and private partners also joined in the effort with the Rocky Mountain Elk Foundation to secure these lands for wildlife and the public. The purchase and conveyance of these lands to the United States also secures and improves access to tens of thousands of acres of public lands within the neighboring National Forest System.

SOUTH BASIN SPRINGS ACQUISITION

SUMMARY

LOCATION
Grant County, OR

PROJECT SIZE
560 acres

COMPLETED
May 31, 2013

RMEF
ELK COUNTRY *Legacy*

In 2013, the Rocky Mountain Elk Foundation took part in a collaborative effort to acquire 560 acres of vital habitat for elk and other wildlife in the South Fork of the John Day River in eastern Oregon. Located south of Dayville, the South Basin Springs land acquisition consolidates the Oregon Department of Fish and Wildlife (ODFW) landholdings within the Phillip W. Schneider Wildlife Area while increasing availability of public access for hunting and recreation. The South Basin Springs tract was at risk of development and could have been split into three parcels with associated residences, creating habitat loss, fragmentation, and permanent loss of access.
