EXHIBIT D

SUBJECT Options to address the use of sodium sulfites in cured eggs used for fish bait---an informational update

PRINCIPAL STAFF PERSON Charlie Corrarino, Conservation and Recovery Program Manager
Phone: 503-947-6213 Email: Charles.a.corrarino@state.or.us
Shaun Clements, Native Fish Investigations Project Manager
Phone: 541-757-5106 Email: Shaun.Clements@oregonstate.edu

COMMISSION ACTION REQUESTED Review and provide comments and direction on the proposed options to address the use of sodium sulfites in cured eggs used for fish bait.

DOCUMENTS ATTACHED

1. Agenda Item Summary
2. July 29, 2011 memo from Bruce McIntosh, ODFW Fish Division Deputy Administrator to egg cure industry representatives with Subject: "Options to address the use of sodium sulfite to cure salmon eggs."
3. A clarifying supplement to Attachment 2 titled "How much sodium sulfite can be used in the dry cure?" Attachment 3 serves as a guide to calculate acceptable levels of sodium sulfite when preparing egg cures and includes specific examples.
4. Updated Public Service Announcement (Draft)
5. Public Correspondence
