Subject: Sodium Sulfite

Dear Commission Members,

As the chief petitioner (with the support of NEDC) for a ban on the use of Sodium Sulfite, I would like to thank ODFW Commission members and ODFW staff for taking a strong position on the use of Sodium Sulfite in commercial egg cures.

I instigated the study leading to the current policy and am very happy with the results. Voluntary compliance to dosage guidelines set by ODFW will ensure all parties are represented and that juvenile salmonids are spared mortality at the hands of sport anglers.

It is very important however, that ODFW Staff follows through on the reporting process. As mandated by staff, manufacturers who fail to report will force the very regulation they've been fighting all along. I will be filing a public records request to review and archive the voluntary reporting process, unless of course, ODFW is willing to share that information.

Thanks,

Jeff Mishler
