Column Descriptions

Table The number of federal- or state-listed Threatened or Endangered native migratory fish species. State "Sensitive" species and federal "Species of Concern" are not included.
 Dist - C The current distance (miles) affected by the site (i.e., the distance that would be made accessible, including tributaries, if passage were provided at the site taking into account other artificial complete barriers).
 DS Obs The number of artificial obstructions downstream which are complete barriers.
 Level The current level of fish passage at the site (i.e., "passability"), using the following ranking criteria:

- 5 - barrier to all native migratory fish
- 4 - barrier to some native migratory fish adults and/or species
- 3 - barrier to some native migratory fish adults and/or species for only part of migration period
- 2 - barrier to all native migratory fish juveniles
- 1 - barrier to some native migratory fish juveniles and/or only part of migration period

DB Rank The rank of the structure within a District Fish Biologist's District, without limitations on number per sub-basin and based on professional judgment and factors that are not otherwise quantified.

Native Migratory Fish - Species Codes

But	Bull Trout	Plan	Pacific Lamprey
Ch	Chinook Salmon	Rb	Rainbow Trout
ChF	Fall Chinook	RT	Redband Trout
