## **INTRODUCTION**

This document contains information regarding the Oregon Department of Fish and Wildlife (department) proposed seasons and regulation changes for the 2024 Big Game Regulations, including tables for the 2024 controlled hunt tag numbers. The 2024 Oregon Big Game Regulations are expected to be printed and available at License Agents, department offices, and online in November 2024.

Soon after distribution of the 2024 Big Game Regulations, the process of developing seasons and regulations for 2025 will begin. Following is the tentative Big Game Regulation development timeline for 2025 seasons which also reflects the process preceding the current staff proposals.

November 2023 - March 2024:	District staff conduct field surveys
April 1, 2024:	Deadline for canceling 2024 hunts or making emergency tag changes
May 15, 2024:	District staff deadline for draft 2025 tag proposals
June 2024:	Division meets with biologists to discuss 2025 seasons, tag numbers, and regulations
July 2024:	Districts conduct public outreach/meetings
August 2024:	Commission packet due to Wildlife Division Administrators
September 2024:	Commission Adoption of 2025 hunting seasons and tag numbers
November 2024:	2025 Big Game Regulations delivered to vendors and available online

## **PUBLIC OUTREACH AND OPPORTUNITY FOR INPUT**

On July 7, 2023, the department posted the initial draft proposals and draft controlled hunt tag tables resulting from the annual coordination with wildlife districts. During the month of July, district staff held seven public meetings across the state to present draft proposals and gather feedback from local constituents. Four regionally-focused meetings were held virtually and the recordings of two of those meetings are posted to the department's YouTube page, with the other three meetings occurring in-person. For both formats, questions were received and addressed by local wildlife biologists. Biologists encouraged participants to provide written comments directly to the department and Commission but also composed written summaries from the local outreach meetings. In addition to the public meetings, field staff also met with interested local constituents and responded to inquiries for information.

## **GENERAL TOPICS AND UPDATES**

### **Cooperative Travel Management Areas**

Eleven date changes to Winter Range Closure Areas and Cooperative Travel Management Areas (TMAs) were adopted into rule by the Commission in September 2022 as part of the 2023 Big Game Hunting Regulation setting process. Adopting these changes acknowledged identical changes would be required by the respective land management agencies but these agencies were unable to enact similar changes. For the 2024 Big Game Hunting Regulations, the department is proposing language that matches previous closure dates with one exception. The Bald/Angel closure has been enacted in US Forest Service (USFS) regulations so the department is proposing mirroring the closure language for 2024 (i.e. April 30 – December 1).

## **HUNTING SEASONS AND SPECIES-SPECIFIC INFORMATION**

### **Review of 2020 Hunt Concepts**

The department initiated a project to thoroughly review the Big Game Hunting Regulations, beginning with the 2018 Regulations and continuing through the 2023 Regulations. For 2024, no major concepts are being proposed but evaluations of two major hunt concepts introduced in 2020 occurred. The first concept was the General Season Antlerless Elk Damage Tag (GSAEDT) hunt which is valid in specific areas for long periods to address elk damage issues. The GSAEDT hunt replaced nineteen controlled hunts and replaced the need for landowner damage tags in these areas during the open season. After three years of observation, the hunt was successful in helping to increase elk harvest by 27% in those areas and reduce landowner damage tags by 22% statewide (this information is provided in greater detail under Damage Tags, LOP Exchanges, Emergency Hunts and Harvest and Table 6). Local impacts from this hunt are far more noticeable in terms of reductions in damage tags issued, increased total harvest, and a reduction in landowner complaints. Therefore, the department is proposing continuation of that concept and expansion where appropriate on a case-by-case basis.

The other concept was the inclusion of spike buck deer in the western Oregon bag limit by changing the bag limit from “one buck having not less than a forked antler” to “one buck with visible antler,” in concert with changes to the Oregon 600-series bag limits with a “one antlerless or spike deer” to “one antlerless deer.” This change made bag limits consistent throughout Oregon, reduced enforcement concerns of spike bucks being mistaken for forked antler bucks, increased the opportunity for hunters to harvest a deer of an abundant antler point classification, and focused the 600-series hunts on addressing damage and population control. The change was anticipated to result in an increase in spike buck harvest but immediately following the change harvest increased across all point classes. After three years of implementation and observation, consistent representation of antler point classes in the harvest indicate the inclusion of spikes in the western Oregon buck bag limit did not impact harvest of bucks in the higher point classes. Nonetheless, the department will continue to monitor the harvest to see if any notable changes occur in the coming years.

### **Proposed General Season Bag Limits and Dates**

Because 2024 is a leap year (29 days in February), most 2024 hunting seasons will have a calendar shift of two days earlier in 2024 than in 2023. As a reminder, the hunting season framework was modified in 2020 so that the season dates are built off the buck deer any legal weapon (ALW) season opening on the first Saturday in October. The current year, 2023, represents the latest calendar dates possible for big game seasons. Seasons will now start moving earlier in the year for a few years. To keep openers on the correct day of the week, the 2024 dates are two calendar days earlier than 2023 (Table 1).

### **Proposed Application and Tag Sale Deadlines**

Controlled hunt application deadlines are set to occur the same date each year (Table 2). Tag sale deadlines (Table 3) are set at 11:59 pm the day before each respective season opens, except general bear and general cougar tags which have the same tag sale/pickup deadline as ALW buck deer.

Table 1. Proposed general season dates and bag limits for 2024.

<b>Species/Season</b>	<b>Bag Limit</b>	<b>Proposed 2024 Dates</b>
<b>DEER</b>		
Western OR. General Buck Deer	Buck with visible antler	Oct. 5 – Nov. 8
<b>BEAR (Cubs, sows with cubs protected)</b>		
General Fall Bear Season	1 Bear	Aug. 1 – Dec. 31
Additional Statewide Bear	1 Bear	Aug. 1 – Dec. 31
<b>COUGAR (Spotted kittens and females with spotted kittens are protected)</b>		
Statewide Tag	1 Cougar	Jan. 1 – Dec. 31
Additional Statewide Tag	1 Cougar	Jan. 1 – Dec. 31
<b>ELK (Note: Antler restrictions apply in certain units)</b>		
Coast First	Any Bull <sup>a</sup>	Nov. 16 – 19
Coast Second	Any Bull or Spike Only <sup>a</sup>	Nov. 23 – Nov. 29
West Cascade	Any Bull <sup>a</sup>	Nov. 9 – Nov. 15
Rocky Mtn. Second	Any Bull or Spike Only <sup>a</sup>	Nov. 9 – 17
General Season Elk Damage Tag	Antlerless Elk	Western Oregon and elk de-emphasis areas, Aug. 1 – Mar. 31; Eastern Oregon outside elk de-emphasis areas Aug. 1 – Nov. 30
<b>ARCHERY (Note: Antler restrictions apply in certain units)</b>		
General Archery Buck Deer – Western Oregon	Buck with visible antler or One Deer (varies by Unit) <sup>b</sup>	Aug. 31 – Sept. 29
NW Deer Late Season	Buck with visible antler or One Deer (varies by Unit) <sup>b</sup>	Nov. 23- Dec. 15
SW Deer Late Season	Buck with visible antler or One Deer (varies by Unit) <sup>b</sup>	Nov. 16 – Dec. 8
Elk	Legal Bull, (varies by Unit) <sup>a</sup>	Aug. 31 – Sept. 29
<b>WESTERN GRAY SQUIRREL</b>		
North-Central Oregon	3/day - 6 in possession	Sept. 15 – Oct. 31
Remainder of Oregon	5/day - 15 in possession	Sept. 1 – Nov. 15

<sup>a</sup> Bag limit for archery hunters and hunters with disabilities permits may be expanded to include antlerless elk in select units. No changes to which units have an expanded bag limit are proposed for 2024.

<sup>b</sup> Bag limit for archery hunters and hunters with disabilities permits may be expanded to include antlerless deer in select units. No changes to which units have an expanded bag limit are proposed for 2024.

Table 2. Controlled hunt application and tag sale deadlines proposed for 2024.

<b>Controlled Hunt Drawing</b>	<b>Application Deadline</b>	<b>Tag Claim Deadline</b>
Spring Bear Draw	February 10	Day Before Hunt Opens
Big Game Draw <sup>a</sup>	May 15	Day Before Hunt Opens

<sup>a</sup> Excludes Spring Bear.

Table 3. General season tag sale deadlines in place for 2023 and proposed for 2024.

<b>Species or Season</b>	<b>2023 Deadline</b>	<b>2024 Deadline</b>
Bear	Oct. 6	Oct. 4
Additional Bear	See Footnote*	See Footnote*
Cougar	Oct. 6	Oct. 4

General Coast 2 <sup>nd</sup> Season	Nov. 24	Nov. 22
Rocky Mt. 2nd Elk	Nov. 10	Nov. 8
General Antlerless Elk Damage Season	No Deadline	No Deadline

\*May be purchased after deadline if first general season tag was purchased by the deadline.

### **Proposed Controlled Hunt Tag Summary**

Total proposed controlled hunt tag numbers for 2024 seasons (149,739) (Table 4) are a decrease of less than 1% from 150,096 in 2023. Within species, number of controlled tags proposed are not changing for pronghorn (0%). Proposed controlled tags are increasing slightly for elk (<1%) and black bear (1%) but decreasing slightly for deer (-1%). Proposed controlled tags for bighorn sheep are increasing 24% driven by slight increases in proposed number of ram tags across multiple hunts and an increase in proposed number of ewe tags in the Deschutes and John Day River hunt areas. Proposed controlled tags for Rocky Mountain goat are decreasing 9% due primarily to proposed deletion of the Hat Point and Goat Mountain hunts. Species-specific information and details are provided in the controlled hunt tag tables for respective species below.

Table 4. Proposed controlled hunt tag numbers for 2024-2025.

Species	Series	Weapon/Type	2023 tags	Proposed 2024 tags	% Change 2023-2024

<sup>1</sup> Any Legal Weapon Season (ALW)

## Deer Season Summaries and Recommendations

### Population Overview

The total estimated mule deer population continued to decline (-3.6%) for 2023 to an estimated 150,000 to 160,000. Of the 49 Wildlife Management Units (WMUs) or portions of WMUs where populations are delineated, 27 had stable or increasing populations while the remaining areas had population declines. Relative to current population management objectives (MO), mule deer are below MO in all but four WMUs.

Western Oregon black-tailed deer populations were historically monitored utilizing spotlight surveys and hunter harvest data. Using data collected by the West Region Wildlife Research (densities, adult and juvenile

survival, buck ratios) as input parameters, newer and more rigorous population models suggest western Oregon black-tailed deer populations are no longer declining and optimistically are increasing in some WMUs.

### **Mule Deer Management Plan Update**

Activities associated with revision of the department’s Mule Deer Management Plan continue. Three webinars addressing seven draft chapters have been presented to the public. Information specific to the mule deer plan was also made available during the July public meeting process for big game seasons and tags. Feedback to the department to date has been generally positive for both the new process and the content of the draft chapters released to date.

### **Damage Tag Exchanges, Emergency Hunts and Harvest**

The department has several options available to assist landowners that may be experiencing damage to agricultural crops caused by deer. Use of hunting to remove animals and re-distribute animals is among those options. Landowners can exchange controlled tags and Landowner Preference (LOP) tags for use on their property. In extreme cases an emergency hunting season can be established allowing the landowner to use other hunters to assist with damage abatement caused by deer on their property.

Relatively few agricultural conflicts have occurred in recent years specifically due to deer (Table 5). The number of tag exchanges in the last three years has declined from 60 in 2020-2021 to 45 in 2022-2023. No emergency hunts were conducted during 2022-2023. Associated harvest to reduce conflict also has declined in recent years from 35 in 2020-2021 to just eight in 2022-2023.

Table 5. Number of deer tags and harvest issued to address conflict in Oregon during the August 1 to March 31 seasons.

Area	2020 - 2021			2021 - 2022			2022 - 2023

<b>Total</b>	<b>60</b>	<b>0</b>	<b>35</b>	<b>46</b>	<b>5</b>	<b>25</b>	<b>45</b>	<b>0</b>	<b>8</b>

### **2022 Deer Season Harvest**

In eastern Oregon, bow hunter numbers declined 32% from 8,041 in 2021 to 5,440 in 2022. Associated harvest in eastern Oregon declined 44% from 1,859 in 2021 to 1,047 in 2022. Those hunters participating in eastern Oregon controlled bow hunts experienced about the same hunter success rate in 2022 (24%) as hunter success rate in 2021 (23%). The observed declines in participation during this second year of transition is likely due to the need for hunters to make a choice on where they desire to primarily hunt interacting with the loss of ability to move between eastern and western Oregon. Hunters drawing a controlled hunt in eastern Oregon tag could not hunt western Oregon general season and vice versa. Most controlled bow deer hunts

were undersubscribed in 2022 with 27 hunts having leftover tags available for purchase beginning July 1, down from 36 hunts having leftover tags available in 2021.

Based on mandatory harvest survey results, the number of general early season bow hunters in western Oregon decreased 7% from 5,355 in 2021 to 4,996 in 2022. Although participation declined, we observed a slight increase in harvest from 625 deer in 2021 to 628 deer in 2022. General western Oregon early season bow hunter success correspondingly increased from 12% in 2021 to 14% in 2022. General late season bow hunters slightly declined from 6,391 in 2021 to 6,234 in 2022 with a 27% increase in harvest from 1,318 in 2021 to 1,674 in 2022.

Based on mandatory harvest survey results, Western Oregon General Buck Deer ALW hunter participation decreased 4% to 64,342 hunters in 2022 (66,978 in 2021), with an 18% decrease in harvest to 16,711 deer in 2022 (28% success). Spike bucks, included in the Western General Season bag limit beginning with the 2020 season, accounted for 15% (2,442 spikes, up 3% from 2021) of the total buck harvest in the general ALW season.

The number of controlled ALW and muzzleloader deer hunters increased 4% from 41,152 in 2021 to 42,666 in 2022. Corresponding harvest decreased 9% from 15,626 in 2021 to 14,253 animals for an overall controlled deer hunting success rate of 47%.

### **General Deer Season Summaries and Recommendations**

As noted earlier most seasons are proposed to be moved two days earlier in the calendar due to the leap year. This includes the Western Oregon General Buck Deer (ALW) and both the early and late periods of General Archery Buck Deer – Western Oregon.

### **Controlled Buck and Antlerless Deer Tag Recommendations**

Few changes are proposed for controlled deer hunts. The department proposes a late season white-tailed deer archery hunt in Grant County and five new youth buck hunts in southeast Oregon (totaling 110 tags). In total, department proposals represent a 1.2% decrease in 100 series controlled buck deer tags to 60,639 for 2023 (Appendix 1) and a 0.4% increase in 600 series antlerless deer tags to 10,109 in 2023 (Appendix 2).

## **Elk Season Summaries and Recommendations**

### **Population Overview**

Rocky Mountain elk populations continued to do well in eastern Oregon. Twenty-two of 29 units (76%) with data are at or near population management objectives. Two areas, the Maupin-Biggs-Columbia Basin units and the East Beulah area, are elk de-emphasis areas. The eastern Oregon population estimate of approximately 71,150 elk is slightly below (97%) the Rocky Mountain elk total population MO of 73,650 animals.

Roosevelt elk populations, however, continue to struggle in some areas of western Oregon. Only five WMUs are near or above population MO. Controlled antlerless hunts are a valuable tool for private landowners to help manage conflict with Roosevelt elk. Controlled antlerless hunts in those WMUs below MO are being maintained at current, conservative levels in areas with high proportions of private land to minimize conflicts with elk. Three areas in western Oregon (the Willamette, Applegate, and Melrose WMUS) are elk de-emphasis areas. While not all WMUs were surveyed in 2023, the estimated Western Oregon elk population is ~54,830, 77% of the established total population MO of 70,850.

### **Damage Tags, LOP Exchanges, Emergency Hunts and Harvest**

The Oregon Legislature passed House Bill 2027 in 2013 directing the Department to create and implement a statewide Oregon Landowner Damage Program to address agricultural damage caused by elk. As implemented, the elk damage tag program has no minimum acreage requirements. Further, the program does not limit the total number of tags a landowner may acquire but no more than five tags may be valid at any given time for a specific landowner. The total number of tags issued for an individual landowner is dependent on the type, severity, and persistence of elk damage. Additionally, the option for landowners to exchange unused LOP tags 1 for 2 to address elk damage was removed.

Since the first year of the program, elk damage tags issued annually fluctuated with 2,256 in 2019-2020. The number of tags issued under this program have since begun to decline with 1,691 tags issued in 2020-2021, 1,679 tags issued in 2021-2022, and 1,926 tags issued in 2022-2023 (Table 6). Associated harvest under the elk damage tag program has also fluctuated but often correlate to the number of tags issued. As such, harvest via elk damage tags has declined in recent years however total elk harvest to address damage has increased 27% statewide with the onset of the GSAEDT.

The observed declines in landowner use of the elk damage tag program are most pronounced in north-central and northeastern Oregon. The number of damage tags issued to landowners in north-central Oregon has declined 51%, and associated harvest has declined 68% since 2019-2020. For northeastern Oregon, tags issued have declined 51% and harvest has declined 50% for the same period. Declines are most likely due to implementation of the General Season Antlerless Elk Damage Tag in agricultural areas with chronically high levels of conflict with elk.

### **2022 Elk Harvest**

Based on mandatory harvest survey results, 90,473 elk hunters harvested 17,114 elk for an overall success rate of 19% (Table 7). General season success (15%) was lower than controlled season success (23%) for elk.

Table 6. Number of elk tags and harvest issued to address conflict in Oregon during Aug 1 to March 31 seasons.

All Surveyed Elk Hunts	90,473	17,114	19%

## **General Elk Season Summaries and Recommendations**

As was noted earlier, most seasons will be moving two days earlier in the calendar due to leap year in 2024. This includes all the general bow and general ALW elk seasons except for the General Season Antlerless Elk Damage Tag seasons (GSAEDT). Seasons for the GSAEDT are set dates either from 1 Aug. to 30 Nov., or from 1 Aug. to 31 March depending on the hunt area. An expansion of General Season Antlerless Elk Damage Tag hunt areas in the Melrose and Chetco Units is also proposed.

## **Controlled Elk Hunt Recommendations**

There are a few changes proposed to control elk hunts for 2024 (Appendix 3). The department is proposing to delete three antlerless elk hunts because two are no longer needed to address damage and one is covered by General Season Antlerless Elk Damage Tag. There are proposed increases in tags for two controlled youth elk hunts to address damage. One new muzzleloader bull hunt in the Sixes Unit and one new controlled youth elk hunt in the Interstate-Silver Lake Units are proposed. Overall, the department is proposing less than a 1% increase to total controlled elk tag numbers for 2024 (Appendix 3).

## **Pronghorn Season Summaries and Recommendations**

### **Pronghorn Population Overview**

Pronghorn are very sensitive to environmental conditions, and population trends reflect variable summer and winter conditions across the landscape. There have been recent concerns of impacts to pronghorn from the winter conditions that persisted well into spring 2023. The majority of the persistent snow occurred at higher elevations outside most pronghorn winter ranges. Although green-up was indeed late, the late snow events occurring on the lower elevation pronghorn ranges resulted in good soil moisture to start the 2023 growing season and do not appear to have impacted pronghorn. Currently pronghorn populations are estimated to be 16,000 to 19,000 remaining relatively stable for the past three years.

### **2022 Pronghorn Harvest**

Mandatory harvest survey data indicate that in general, pronghorn hunters continue to enjoy good success. Any Legal Weapon hunters (1,313) harvested 1,008 pronghorn (77% success), muzzleloader hunters (99) took 39 animals (39% success), and archery hunters (323) took 100 animals (31% success). Youth hunters had a fairly high success rate with 30 hunters taking 20 pronghorn (67% success).

### **Pronghorn Tag Recommendations**

Few season changes are proposed for the 2024 pronghorn hunts. A proposed increase in pronghorn tags for the Beulah Unit hunt comes after an observed increase in population estimates. Conversely, a population decline has been observed in the South Wagontire hunt area, and the department proposes deleting that hunt for 2024. The department is proposing 2,072 tags in 52 hunts for 2024 which is identical to 2023 tag numbers (Appendix 4).

## **Bighorn Sheep Season Summaries and Recommendations**

### **Population Overview**

California bighorn are found primarily in the high desert mountains, buttes, and uplifts of southeast Oregon and in the John Day and Deschutes River canyon systems. Except for a few herds in far southeastern Oregon most bighorn populations continue to remain relatively stable. The statewide California bighorn population estimate is 4,200 to 4,500 animals.

Rocky Mountain bighorn are found primarily in northeast Oregon, populations are estimated to be 800 – 900. Latent respiratory disease health issues also persist in some herds of Rocky Mountain bighorns. ODFW continues its collaboration with the Hells Canyon Restoration Initiative (HCI) in the tri-state area of Oregon, Washington, and Idaho. Through this process the department is aggressively researching the bighorn sheep disease issue and evaluating active management solutions. The HCI now supports a resident landowner outreach position focused on solutions to interactions between wild and domestic sheep in the area.

Several California bighorn herds in Oregon including the Lower Owyhee, the Rattlesnake-Tenmile, and the Burnt River herds continue to struggle with effects of the bacteria (*Mycoplasma ovipneumonia*, (*Movi*)). *Movi* causes pneumonia like respiratory disease that leads to mortality and impacts all age and sex classes in affected herds. The department has implemented aggressive testing and removal of chronic carriers in the Rattlesnake-Tenmile and Burnt River herds and is beginning to see lambs return to Rattlesnake-Tenmile herd. Test and remove operations will begin in the lower Owyhee population this winter. In February 2020, disease was found in the Lookout Mountain herd near Baker City. The department is in the third year of test and remove in Lookout Mountain with moderate results.

### **2022 Bighorn Harvest**

Oregon bighorn hunters continued to enjoy high success rates. All five Rocky Mountain bighorn tag holders harvested sheep (100%), and the special auction tag holder took a Rocky Mountain bighorn. Sixty-six California bighorn sheep rams were taken by 68 ram tag holders (97% success), with the special raffle tag holder taking a California bighorn. Last year (2022) was the second year the department authorized hunting opportunities for ewes (females) with seven tags in the John Day River and five tags in the Deschutes River populations. Ewe harvest is a tool to help manage population size with less disease risk than translocation. Persons drawing bighorn tags with a ewe bag limit are not subject to the once-in-a-lifetime restriction that applies to hunters drawing controlled bighorn tags with a ram bag limit. For 2022, 50% of the 12 ewe tags were filled.

### **Bighorn Sheep Tag Recommendations**

One California bighorn hunt (548 Heppner Unit) will be deleted for 2024. This hunt was deleted due to population concerns brought on by poor count numbers and difficulty finding rams in the area. For 2024, the department is proposing 122 Bighorn Sheep tags (77 California ram, 40 California ewe, 5 Rocky Mountain ram) in 30 hunts (27 California, 3 Rocky Mountain; Appendix 5). Additions to several California bighorn hunts resulted in an increase of 24 tags (24%) with most of the increase due to increases in ewe tags. Six ram tags and three ewe tags will be allocated to non-residents bringing the overall non-resident tag percentage to 7.4% percent.

## **Rocky Mountain Goat Season Summaries and Recommendations**

### **Population Overview**

Rocky Mountain goat populations have remained stable or increased in recent years. The total population is estimated to be ~1,200 animals, with the largest established populations found in the Wallowa and Elkhorn mountains. One population is found in the Cascades, primarily on Mount Jefferson and Three Fingered Jack. This population was impacted by the Lionshead fire in September 2020. However, recent surveys reveal that while the distribution of goats in the population has changed post fire, the overall population size was unaffected.

## **2022 Rocky Mountain Goat Seasons**

A number of Rocky Mountain goat hunters were impacted by wildfires during the 2022 seasons. Consistent with ODFW policy, the Department accommodated tagholders in seven hunts with extended season dates for the 2022 seasons. Further, as approved by the Commission in December 2022, the season for three tagholders who had no opportunity to hunt during 2022 was extended to include the 2023 season.

Rocky Mountain goat hunters had a slightly lower success rate in 2022, and the required field orientation provided by biologists continues to be useful for helping hunters minimize harvest of female goats. In 2022, the Commission authorized 29 Rocky Mountain goat tags in 16 controlled hunts and two special tags (one auction tag and one raffle tag). Twenty-three of 29 controlled tag holders and both special tag holders were successful for an overall success rate of 79%. Two goats scored over 50 inches Boone and Crockett green score with one exceptional goat scoring over 51 6/8 inches.

## **Rocky Mountain Goat Tag Recommendations**

Four hunts are proposed for deletion in 2024 to accommodate population declines and impacts of the 2022 fires. For 2024, the department is proposing 21 Rocky Mountain goat tags in 12 hunts (Appendix 6). Two tags (9.5%) will be issued to non-resident hunters.

## **Bear Season Summaries and Recommendations**

### **2022 Spring Bear Harvest**

In 2022, 9,370 spring bear tags were sold (up from sale of 8,878 in 2021). Mandatory harvest surveys indicate 5,612 hunters participated (60% participation rate) and 919 bears were taken during the 2022 Spring Bear Controlled Hunts (up from reported harvest of 743 in 2021). The success rate of Controlled Spring Bear hunters was 16% across all hunts. Harvest per days hunted was a rate of one bear per 38 days hunted. The majority of the bears reported harvested were males (70%).

### **2022 General Fall Bear Harvest**

The number of general season black bear tags issued increased from 65,354 (64,231 General Season tags, 1,123 Additional tags) in 2021 to 68,082 (66,850 General Season tags, 1,232 Additional tags). Mandatory harvest surveys indicate 1,713 bears were taken during the 2022 General Fall Bear season and 23,266 hunters participated (36% participation rate). The success rate of hunters participating in the 2022 General Fall Bear season was 7.4%. Of the bears harvested, 86 were harvested with an Additional Fall Bear Tag (5% total harvest).

Participation and success were similar to the 2021 General Fall Bear harvest. Reported harvest indicated 63% of the General Fall Bear harvest in 2022 consisted of males and total harvest continued to be higher in western Oregon (58% of harvest) than eastern Oregon.

## **Bear Population Monitoring**

### *Indices*

Continued monitoring of harvested bear ages, as directed by the Oregon Bear Management Plan (Plan) and consistent with other states, suggests bear populations are not being over-harvested. According to the age criteria in the Plan, a bear population is considered over-harvested when the median age of all harvested bears is  $\leq 3.0$  years, the median age for harvested males is  $\leq 2.0$  years, and the median age of harvested females is  $\leq 4.0$  years. In 2022, the median age for all harvested bears was 4.0, the median age for harvested males was 4.0,

and the median age for females was 5.0 (identical values to 2021). Therefore, these criteria indicate over-harvest is not currently occurring. Based on mandatory check-ins, 66% of the bears taken by hunters (spring + fall) in 2022 were males.

In addition to assessing level of harvest based on median ages, the Plan directs the department to monitor the three-year average percent of adult males (greater than or equal to 5 years old) of all known mortalities and percent of all females in all known mortalities to help ascertain take levels (light, moderate, or high based on Plan criteria). The 2020-2022 average for adult males in documented mortalities was 31% and is indicative of a moderate take levels (light >35%, moderate 25-35%, heavy <25%). For females (greater than or equal to one year old), the 2020-2022 average percent of all mortalities was 30%. These values are indicative of moderate take levels (light <30%, moderate 30-40%, heavy >40%).

### *Modeling*

An integrated population model (IPM) was completed in 2022 that uses multiple sources of Oregon black bear data collected by the department to produce population estimates for each of four bear regions (NW, SW, South Central, NE). Current statewide estimates, which are produced by summing all region estimates, total approximately 34,000 ( $\pm$  5,000) black bears statewide. The model also allows the department to make predictions regarding future population estimates by modifying various sources of mortality and variability in model parameters. As directed by the Plan, the department will continue to use the beforementioned indices in addition to the new IPM to monitor bear populations in Oregon.

### *Check-ins*

Due to previous low black bear tooth voluntary submission rates, the department implemented a mandatory check-in of bear skulls beginning in 2008 as directed by the Plan. Specifically, successful hunters are required to bring the unfrozen skull of any bear they harvest to a department office or a designated check-in site within 10 days of harvesting their bear. A tooth is collected and sent to a lab for aging. This information is important for monitoring population structure and as part of efforts to develop a methodology for estimating black bear populations. Due to Covid-19 concerns, the physical check-in requirement for bears was temporarily lifted in Spring 2020 and remained lifted until department offices re-opened for public visitation in Spring 2022. Hunters were still required to report their harvest but through non-contact means including phone and email. A total of 2,484 bears were checked-in in 2022. Data indicates that there was a large dip in the check-in rate due to the temporary rule changes in 2020 and 2021; however, this rate increased from 65% in 2021 to 76% in 2022. A return to pre-Covid-19 check-in rates (~85%) is anticipated for 2023 and beyond.

### **Complaints and Other Mortalities**

The total number of complaints recorded for black bear significantly increased from 535 in 2021 to 1,032 in 2022 (Table 8). Most complaints received fell into four main categories of human/pet safety, livestock/agriculture, nuisance/structural damage, or garbage. The number of bears killed as a result of damage to timber, livestock, or property increased from 257 in 2021 to 348 in 2022. The dramatic increase in damage complaints in 2022 can be explained by the weather that occurred in the spring and summer of 2022 and the subsequent impact to food availability. Much of Oregon experienced a cold weather event late in the spring followed by a long, hot and dry summer. Berry crops across the landscape failed and grasses died off early. This lack of natural food availability likely drove bears down into more urban areas and resulted in the increase in conflict. Most conflict-related mortality (90%) continues to occur in western Oregon, where human and bear populations are highest, resulting in damage, human safety concerns, and nuisance problems.

## 2024 Spring Bear Season/Tag Recommendations

The department is proposing 10,773 controlled tags in 18 hunts for 2024, 146 more tags than 2023 (Appendix 7). Changes from 2023 are limited to a proposed tag increase for the 762A Pine Cr – Keating – Catherine Cr hunt (from 440 to 495) and for the 731A South Central hunt (from 495 to 550). In these WMUs and elsewhere, robust bear populations are sufficient to allow for the increase in tags and potential harvest without any long-term impacts to bear populations.

## 2024 General Bear Season Recommendations

General Fall Bear Season dates are Aug. 1 to Dec. 31 statewide, and staff propose maintaining those dates. Hunters may purchase and fill an additional fall bear tag if they fill their first tag; however, hunters must purchase the general season tag prior to the deadline to be eligible to purchase an additional tag. This additional fall bear tag hunt area is applicable statewide and is consistent with the additional cougar tag. Staff propose maintaining a statewide hunt area for the additional fall bear tag.

Table 8. Trends in black bear complaints, damage, harvest, and other mortality in Oregon during 2003-2022. Complaint and mortality data are current through 07/10/2023. Numbers may change as late data are added.

Year	Number of Complaints <sup>a</sup>	Number of Tags Sold <sup>b</sup>	Mortalities				Total
			Hunter-Harvest <sup>c</sup>	Damage <sup>d</sup>	Human Safety <sup>e</sup>	Other <sup>f</sup>

2021	539	74,232	1,581	257	33	62	1,933
2022	1,032	77,452	2,001	348	54	81	2,484

<sup>a</sup> Number of complaints received during the calendar year. Sightings not associated with damage or a public safety concern are not included as complaints.

<sup>b</sup> Includes controlled spring, general fall, and additional tags (including Sports Pac licenses).

<sup>c</sup> No harvest survey conducted during 2004. Hunter-harvest data based on mandatory check-in during 2008–present. Additional bear tags not surveyed 2005–2007.

<sup>d</sup> Number of animals killed as a result of damage during a calendar year.

<sup>e</sup> Animals killed as a result of real or perceived threat to humans or pets.

<sup>f</sup> Includes roadkill, accidental, found dead, nuisance, or illegal kill.

## Cougar Season Summaries and Recommendations

### Population Overview

The department uses a deterministic, density-dependent population model (Keister and Van Dyke 2002) to estimate annual cougar abundance in Oregon from 1987 to present at the statewide level, and 1994 to present at the zone level. Like most state-level population models for cougars, this model relies on mortality data (harvest and non-harvest) to develop estimates. The statewide population across all age classes for 2022 was estimated to be 7,068 and has been increasing slowly since 2006. As cougar zones near estimated carrying capacity, this growth will continue to remain low and/or slow with current observed mortality rates. No cougar zones reached their respective quotas (i.e. mortality caps) in 2022 (Table 9) suggesting further continued population growth when not at carrying capacity.

Table 9. Total cougar mortalities documented by Cougar Management Zone for 2016-2022.

Zone	Zone Quota	Total Mortality						
		2016	2017	2018	2019	2020	2021	2022
A Coast/N Cascades	180	117	157	193	160	138	162	149
B SW Cascades	200	131	140	156	111	97	123	117
C SE Cascades	80	42	43	40	23	20	12	24
D Columbia Basin	100	27	38	39	30	24	22	31
E Blue Mtns.	270	114	142	117	125	102	87	105
F SE Oregon	140	55	51	45	42	46	32	32
Total	970	546	571	591	491	427	438	458

Also included in the Oregon Cougar Management Plan, when the average proportion of 3+ year old female cougars in the total mortality exceeds 35% in a zone, the department considers a zone cougar population to be exceeding mortality levels. In the past decade, no cougar zone has exceeded this criteria (Table 10).

Table 10. Three-year averages of annual proportions of adult ( $\geq 3$  year old) females of known ages for all sources of mortality by cougar management zone in Oregon, 2008–2022.

Year	Zone					
	A: Coast/N. Cascades	B: SW Cascades	C: SE Cascades	D: Columbia Basin	E: Blue Mountains	F: SE Oregon
2008–2010	17.2	18.9	11.4	26.4	26.7	24.3
2009–2011	17.1	18.5	13.8	27.1	28.6	22.6
2010–2012	15.9	14.1	16.4	23.5	25.9	22.0
2011–2013	13.7	14.0	21.0	20.0	22.0	21.1
2012-2014	12.1	12.4	20.2	17.4	21.5	14.4
2013-2015	12.2	12.7	16.6	22.6	22.2	12.3
2014-2016	14.0	12.1	19.0	21.3	23.9	15.0
2015-2017	16.1	13.4	20.1	18.5	22.7	20.1
2016-2018	19.1	12.5	22.4	16.8	23.1	25.0
2017-2019	18.1	13.6	16.7	17.8	22.7	19.6
2018-2020	16.7	11.6	12.3	15.1	20.4	16.8
2019-2021	14.8	13.3	13.9	16.9	18.9	15.0
2020-2022	13.7	13.0	16.0	16.5	15.1	19.5

## Trends in Harvest, Conflict, and Mortalities

A noticeable bump in cougar tags issued was observed in 2022 with sales increasing from 72,740 in 2021 to 73,534 (Table 11). Hunt mortalities increased from 254 to 334 (Table 11). Cougar tags sold as part of a Sports Pac continue to comprise the majority of cougar tags issued. Table 11 provides information regarding trends in damage complaints and known cougar mortalities from 2002 through 2022. The total number of statewide damage complaints and cougars taken for human safety increased slightly in 2022 as did the number of cougars taken due to damage (Table 11). All non-hunting cougar mortalities increased slightly to 191 in 2022.

## Target Areas

No Cougar Target Areas are underway or being proposed at this time.

## 2024 General Cougar Season Recommendations

There are no proposed changes to the 2024 cougar season length (January 1-December 31) and no proposed changes to the 2024 cougar zone quotas (i.e., mortality caps).

Table 11. Trends in cougar complaints, damage, harvest, and other mortality in Oregon during 2003– 2022. Complaint and mortality data current through 8/2/2023. Numbers may change as late data are added.

Year	Number of Complaints <sup>a</sup>	Tags Sold <sup>b</sup>	Mortalities					Total
			Hunter-Harvest	Damage <sup>c</sup>	Human Safety <sup>d</sup>	Administrative Removals <sup>e</sup>	Other <sup>f</sup>

2018	669	61,030	270	175	39	68	39	591
2019	569	64,237	280	135	36	4	36	491
2020	538	66,097	274	113	15	0	26	427
2021	491	72,740	255	134	20	0	29	438
2022	513	73,534	259	146	29	0	24	458

<sup>a</sup>Complaints received during the calendar year. Sightings not associated with damage or public safety concerns are not included.

<sup>b</sup>Includes general and additional tags (including Sports Pac licenses).

<sup>c</sup>Number of animals killed as a result of damage during a calendar year.

<sup>d</sup>Animals killed as a result of real or perceived threat to humans or pets.

<sup>e</sup>Administrative removals on cougar target areas (2007–present only).

<sup>f</sup>Includes roadkill, accidental, found dead, and illegal kill.

<sup>g</sup>Hunting season changed to calendar year.

## Western Gray Squirrel Season Recommendations

There are no changes proposed to 2024 western gray squirrel seasons (Table 12). Western gray squirrel season information is included in both the Big Game Regulations and the Game Bird Regulations because in many areas western gray squirrel are hunted along with upland game birds.

Table 12. Proposed western gray squirrel seasons and bag limits for 2024.

Hunt	Units	Bag Limit	2023 Dates	Proposed 2024 Dates
North-Central Oregon	34, 35, 39, 41, 42	3/day - 6 in possession	Sept. 15 - Oct. 31	Sept. 15 - Oct. 31
Remainder of Oregon	*10-33, 36-38, 40, 43-77	5/day - 15 in possession	Sept. 1 - Nov. 15	Sept. 1 - Nov. 15

\*That portion of Unit 30 (Rogue) south of Rogue River and South Fork of Rogue River and north of Highway 140 is open year-round with no bag limit.

## Premium Hunt Summaries and Recommendations

In 2015, the Commission adopted three new controlled hunt series creating the “Premium Hunts”: one series for deer, one series for elk, and one series for pronghorn. Interest in Premium Hunts remains stable with a total number of first choice applications of 77,007 in 2023, including 29,135 applications for deer, 30,275 for elk, and 17,597 for pronghorn. Sales rate for the 2022 Premium Hunt tags was high with only four tags which were not purchased (two elk tags, two deer tag; Table 13).

Premium tag holders continue to have high success rates compared to other controlled and general season tag holders. Premium deer tag holders had 83% success, premium elk tag holders 57%, and premium pronghorn tag holders 67% success. Seventy-one percent of successful hunters with premium deer tags harvested a 4 point or larger buck and 67% of premium elk tag holders harvested a 6 point or larger bull (Table 13). All but one successful premium pronghorn tag holders harvested a buck.

Table 13. Hunter effort and harvest for Premium Hunts in 2022.

Species	Tags Sold	Reports	Went Hunting		Antlerless	Spike/Buck <sup>a</sup>	2 Pt	3 Pt	4 Pt <sup>b</sup>	5 Pt	6 Pt+	Total Harvest
			No	Yes								
Deer	65	60	2	58	2	0	4	8	34			48
Elk	62	68	5	53	4	1	0	1	0	4	20	30
Pronghorn	27	26	2	24	1	15						16

<sup>a</sup> Buck applies to pronghorn, otherwise the column represents spike deer and elk.

<sup>b</sup> 4 Pt for deer represents bucks with 4 or more points on one antler

There are 67 Wildlife Management Units (WMUs) in Oregon, 20 in western Oregon, and 47 east of the crest of the Cascade Mountain Range. Most of the Premium Hunts are for a single WMU, a few are for two adjacent WMUs. For 2024, one Premium Deer Tag is proposed for each of the 67 WMUs. Hart Mountain National Antelope Refuge will be open for the Beatys Butte (L70) and Juniper (L71) premium deer tags for the Refuge portions within the respective units. One Premium Elk Tag is proposed for each WMU except for three hunt areas that include two WMUs, the Owyhee/Whitehorse hunt area, Steens Mtn/Beatys Butte hunt area, and Juniper/Wagontire hunt area, resulting in 64 elk tags. There are 26 Premium Pronghorn Tags proposed which would be no change from 2023. In total there are 157 premium tags proposed: 67 deer tags, 64 elk tags, and 26 pronghorn tags (Appendix 8).
