

Exhibit C

2022 Nearshore Logbook Report

The Oregon Legislature established a management system for the commercial nearshore fishery in 2003, which includes a logbook requirement. Oregon Revised Statute 508.953 directs the Department to report to the Commission on the logbook program each year. Starting with calendar year 2022, the Department integrated the logbook report with an annual report on the commercial nearshore fishery that also includes landing and sampling data. The integrated annual report can be found online here:
